COMMUNIST STRENGTH

IN the December issue of the "World" magazine, a map is shown presenting the strength of communism in today's world. This influence ranges from "absolute" to "inconsequential." The Communist party is the sole power in the Union of Soviet Republics, and is also in absolute control in Yugo slavia, Bulgaria anud Albania.

In Poland, Rumania and Hungary (all adjacent to the Soviet) Communism controls the government, and is the dominant force, though it still depends to some extent on coalitions. In Finland and Czecho-Slovakia there are still functioning parliaments, but the Soviet influence is very strong in key posts. It is also credited with substantial influence in France, Italy, Greece, Algeria, China, French Indo China, and in the western hemisphere in Brazil Cuba and Chili.

Communist influence is of a minor nature in Spain Sweden Norway, Germany, Iran, Afghanistan, India and the Netherland East Indies, also in Argentine, Colombia Venezuela, Cuba, Bolivia, Paraquay and Uruguay.

According to the "World" map, Communism is inconsequential in Britain, Turkey, Iraq, Burma, Philippines, Africa and Australia, as well as in Peru, United States, Canada and Guiana.

In China the Communist party is said to control important areas in China, which have a population of from 70 to 100 million people.

Communist political power in the world today embraces one-fifth of the inhabited earth with about 350 million inhabitants. In the opinion of the editors of the United Nations World the only two countries confronted with a possible seizure of power by communists are Greece and China, and the reason for this possibility is the weakness of central administration and growing communist power. The hope is that U.S. interest and military power may be strong enough to hold back the communist wave.

This magazine, which keeps in close touch with world developments, sees both strength and weakness in the fact that Russia has become the centre of gravity of international communism. It means a great spread of communism from Russia, but it also means that the ideas of Russian leaders and the political needs of Russia itself become a primary consideration in international politics. And pro-Communist countries may still at times want to act independently of Russia.

Items From Bob Edwards' Inimitable "Eye Opener"

In the High River Eye Opener of February 16, 1903, Bob Edwards is in very realistic mood. He gloats over the things an editor would say if he ever got to the point where he had nothing to lose by telling the truth. Then he defines the terms used by party newspapers in describing meetings held by the candidate of their choice and by the opposing candidates. The stock terms pulled out for use in a political campaign don't mean a thing in any factual sense.

An Editor's Dream

When a little country paper finds itself on the verge of going bust for lack of support the editor should nourish his soul by getting off a few specimens of gospel truth regarding the people of the town. Of course he would have to have a horse ready saddled at the back door on date of publication, so that he could make his exit from the back as the paper goes out the front door. Get away day should be observed in every newspaper office, at least once in a lifetime. It would do the editor no end of moral good.

The last issue of a busted paper in Pumpkin Centre or Squaw Hollow should read like this—

John Boon, the laziest merchant in town made a trip to Okotoks Wednesday and got all tired out.

John Doyle our grocer, is doing a mighty poor business. His store is dusty and dirty and we don't care for the cat that sits in the prune barrel.

Rev. J. Sky preached Sunday night on charity. The sermon was punk. If the reverend gentleman would live up to what he preaches, he might gather in more sinners.

Dave Sanky died at his home on Tuesday. The doctor said heart failure but what do you think? His home is an old shack on Rowdy Street.

Married—Miss Myra Rhodes and James Mamahan were united on Saturday evening at the Baptist parsonage. The bride is a very ordinary looking girl who knows no more about cooking than a rabbit, and never helped her mother three days in her life. She has a gait like a fat duck. The groom is well known as an up-to-date loafer. He has been living on his old folks all his life. They will have a hard time together and the Times has no congratulations to offer, as it is doubtful if any good can come of such a union.

Died—Simeon Calmont, aged 50 years died this week. He was an illnatured man with an eye to the boodle. He came here in the night with another man's wife and joined the lodges and church first shot. He owes us several dollars for the paper, large bills at the butchers and grocers, and you could hear him engaged in songs of praise for blocks. He was buried in an asbestos-lined coffin, and his sparse gathering of friends threw palm leaf fans on his grave as he may need them. His tombstone will be a resting place for owls.

Campaign Definitions

Now that federal elections may be coming along soon, we beg leave to draw attention to some campaign definitions which should be useful in reading party newspapers.

Stupendous ovation—five hundred persons welcome your candidate.

Feeble cheering—Five thousand persons welcome the other man.

Deafening cheers—Two hundred and fifty persons, greeting your man.

Scattered applause. Three thousand persons greeting the other man with yells of approval.

Inspiring scene—Futile efforts of a few slobs to make a showing for your candidate.

Pitiful farce—Attempt of the other side to make a similar showing for their man.

Visibly affected—Term describing your candidate when he is trying to make a speech while full of booze.

Packed to the doors—Condition of a half-empty hall when your candidate spoke.

Sparsely filled—Condition of the same hall when it contains 3000 of the other crowd.

Irrepressible enthusiasm—Interruptions when you man speaks.

Outbreak of jeers—Something happening to the other fellow.

Felicitous address—Spiel by one of the heelers on your own side.

Empty platitudes—Same kind of spiel by one of the opposition's lesser lights.

Unanswerable arguments—Your candidate's statements.

Futile windjamming—The other man's way of putting it.

Disorderly behaviour—The way the other party greets its man.

NEWS OF INTEREST

The commission handling blitz and doodle bug claims for damaged private buildings in Britain expect to be paying out for another 10 years.

The Marshall Plan, as seen from the European end, calls by 1951 for $22,440,000,000 worth of imports from "North America." Please note, not from the U.S.A. alone.

Loan from Internat onal Bank $3,130,000,000; from U.S. $16,310-000,000; from other North American countries $3,000,000,000.

Answering Your Questions ABOUT IMPORT CONTROL

MOST of the countries which are Canada's regular customers have not recovered sufficiently from the war to pay, in the normal way, for all the goods they need, despite extensive help from this and other countries. Nor are they able to send us enough of their goods to balance accounts—or to pay us in the kind of money which we, in Canada, can use to buy goods in other countries.

At the same time, Canada has been buying more goods than ever before from the United States and other countries demanding U.S. dollars. This is because these goods were not obtainable elsewhere and because of demand pent-up during the war.

Buying from the United States or U.S. dollar areas must, therefore, be temporarily reduced until our trading again becomes normal.

To meet this emergency, purchase of goods and services or expenditures for travel, which must be paid for with U.S. dollars, are now subject to control.

IF YOU ARE AN IMPORTER OF CONSUMER GOODS and wish to find out what goods are (1) prohibited, (2) subject to quota, or (3) unaffected by controls, see or write your nearest Collector of Customs and Excise.

IF YOU WISH TO IMPORT GOODS SUBJECT TO QUOTA and wish to establish your quota authorization to import, or need special information, consult your nearest Collector of Customs and Excise. Quota application forms (E.C. 1) and instructions for completing them, are available at all Customs Offices. These applications must be filed with the Collector of Customs and Excise.

IF YOU WISH INFORMATION ON THE AMOUNT OF YOUR QUOTA. After your application has been filed with your Collector of Customs and Excise, all correspondence about the establishment of quotas or cases of exceptional hardship through import prohibitions should be directed to Emergency Import Control Division, Department of Finance, 490 Sussex Street, Ottawa. Quotas are issued on a quarterly basis and any unused portion may be carried over into the following quarter.

IF YOU ARE AN IMPORTER OF PRODUCTION PARTS, STRUCTURAL STEEL, stone, machinery or other capital goods or automobiles, and wish to know the import restrictions in these classifications, write or see Emergency Import Control Division (Capital Goods), Department of Reconstruction and Supply, 385 Wellington Street, Ottawa.

IF YOU INTEND TO TRAVEL OUTSIDE CANADA and wish to know about foreign exchange available for this purpose, consult any bank or the Foreign Exchange Control Board at Ottawa, Montreal, Toronto, Windsor, Vancouver. If you wish information about personal purchases of goods made during travel outside Canada, consult the nearest Collector of Customs and Excise before departure.

IF YOU ARE A MANUFACTURER, WHOLESALER OR RETAILER and wish information about excise taxes, or about the list of goods to which they apply, consult the nearest Collector of Customs and Excise.

IF YOU NEED OTHER SOURCES OF IMPORTS consult the Foreign Trade Service, Department of Trade and Commerce (Import Division), Ottawa, regarding your supply problems arising from import quota restrictions. Through the Trade Commissioner Service, the Import Division is endeavouring to arrange increased supplies from the United Kingdom and other "non-scheduled" countries.

IF YOU ARE A HOUSEWIFE and wish information on available alternate foods which have comparable nutritional values to those now prohibited or subject to quota, informational material which has been prepared by the Nutrition Division of the Department of National Health and Welfare may be secured from your Provincial Health Department or local health unit.

The administration of these emergency import controls is the responsibility of various departments of the Government. The above information is given to aid Canadian citizens in complying with the new import control regulations with a minimum of inconvenience in their business and personal affairs.

QUALITY WHEAT

Hard wheat is grown mainly in the fertile soils of the prairie grass regions. It is of high quality because of soil fertility. Among the chemical elements representing this fertility are calcium, phosphorus, nitrogen, potassium and some eight or more other elemnts that, by their domination or scarcity, control the chemical composition of the feeds and foods and thereby the food quality in nourishing us.

Soft wheat is grown on less fertile soils where the forests were cleared away. It is mainly starchy and provides energy values.

Food quality differs as the soil fertility differs, not only because different crops are produced as the soil fertility differs but also because the same crop will be different in its chemical properties and its food values.

Canada's best contribution to European recovery would be to make a direct deal with Britain to enable that country to keep on buying at the recent level, without having to pay in "dollars." We could say "sterling is okay with us."
